Help selecting a product – a focus on your application

The comprehensive RK Rose+Krieger product portfolio provides you with multiple components for your scope of application. With this brochure we would like to help you to select a product for your application in a simple way. If required, you will find detailed information in the respective main catalogues. If you do not find the right product or you would like some help making a choice, our product consultants are of course available.

Starting with your application, the three RK selection guides „Profile Technology“, „Connecting Technology“ and „Linear Technology“, direct you to the right product in just a few steps.

Why try for so long...

...when it’s quicker with our system
CONNECTING TECHNOLOGY
Connecting precision round and square tubes reliable and stable

- Light Clamps (Plastic)
- Solid Clamps (Aluminium)
- Robust Clamps (Stainless steel)

PROFILE TECHNOLOGY
Combining profiles without mechanical processing!

- Structural profiles
- Functional profiles
- Heavy duty profiles

LINEAR TECHNOLOGY
Moving and positioning

- Linear units
- Electric cylinder
- Lifting columns
Connecting precision round and square tube reliably and stable whilst also making releasing easy appears to be a difficult task. The RK connecting technology, which has been proven over years of use, meets this requirement in a simple and almost perfect fashion. Our versatile connection elements offer you the chance to implement creative and flexible solutions, because you can rely on our product. We are sure to have the right part for you, and if not we will develop one especially for you.

Why drilling, riveting, welding...

...when it’s quicker with our reliable clamping system.
The four steps to your product recommendation

Step 1: The application always takes centre stage
- Light load range
- Medium to heavy load range
- Shock-proof load range

Step 2: What features should the product have?
- Right angle tube connection
- Axially parallel tube connection
- Hinge tube connection

Step 3: Which product design do you want?
- Single-piece elements: For faster and more economic assembly
- Multi-piece elements: For later on assembly and upgrading

Step 4: Which performance category do you require?
- Round tube
- Square tube
- Ø Diameter

No drilling or welding, no bevel cut

ITAS designs make it easy to assemble simple railings as well as sophisticated stairs and working platforms. The ITAS „Internal Tension Application System“ is an easy plug in principle. It reduces assembly time to a minimum. The connection is realized by tightening special clamping screws. The smooth intersections persuade with a pleasant surface feeling and contribute to the overall safety.

Selection guide profile technology

What matters is not only the profile, it is also the connection between the profiles. Years of application experience have resulted in an industrial aluminium profile system which can meet almost any requirements. Unlimited creativity combined with the highest levels of flexibility and proven reliability offers you multiple possible solutions to your requirements.

Benefit from all the advantages, especially connection without machining being required. The success of a system is the sum of its parts, based on strong individual parts.

In order for you to preselect the most suitable range quick and easy, we have developed a system which is strictly application orientated. You can determine the most suitable size and design based on your performance requirements within the range.

We are always here, of course, to assist you personally with your selection.

Save the drilling... ...there’s no need for!

Profile connection types

Over the years RK Rose+Krieger has developed a number of profile variants. Corresponding connection types are available according to the type of profile and application.

Flange bracket for structural / functional profiles

Features:

✓ Machining of profiles is not necessary
  – no additional costs, no shavings

✓ Supplementary moving,
  – displacement of mounting position is possible
  – adjustable during assembly

✓ Minimum preparation effort
  – order and install

✓ Compatible with other RK Products

Press mount connector for heavy duty profiles

Features:

✓ Economical connecting types
  – low installation costs

✓ Additional machining of profile is not necessary

✓ Dynamic, highly loudable screw connection
  – releasable at any time

Corner joint and special joint for functional profiles

Safety Guards

Features:

- ✓ Sturdy protection system in aluminium design
- ✓ Minimum of designing efforts thanks to standard modules
- ✓ Assembly with no need for machining
- ✓ Clamping profiles can receive the most different surface elements
- ✓ Smooth, easy-care outer surface, attractive design
- ✓ Extensive accessory programme
- ✓ Conform to the new European Machinery Directive 2006/42/EC
- ✓ Upon request we supply safety guards in accordance with standard DIN EN ISO 14120, protection against mechanical danger.

RK Easywork Assembly Workstation-Systems

With the RK Easywork selection tool, a complete assembly work table can be configured online to meet ergonomic and task-specific requirements. Step by step, the selection tool guides you through all of the options on the way to creating your ideal workstation. Additional lighting, holders for grab containers, foot rests, standing chairs and ESD accessories are all available, along with other useful devices.

The RK Easywork workstation system is based on RK Rose+Krieger’s complete modular system. BLOCAN® construction profiles made from aluminium and the electrically driven lifting columns offer a perfect combination for the creation of high-quality table concepts. Customers can choose between the simplest static tables or electrically height-adjustable work tables and configure their own combinations.

Step 1:
Determine the dimensions required

Step 2:
Design your workstation online

Step 3:

Guiding, adjustment, positioning or uniform motion, the requirements for linear motion operations are as numerous as the solutions. We offer you a wide spectrum of linear motion components, starting with an occasional manual movement, as well as frequent operation, through to continuous high dynamic positioning.

In order for you to preselect the most suitable range quick and easy, we have developed a system which is strictly application orientated. You can determine the most suitable size and design based on your performance requirements from within the range. We are always here, of course, to assist you personally with your selection.
