

## Information on “REACH”

Information on the regulation “**(EC) No. 1907/2006 for the Registration, Evaluation, Authorisation and Restriction of Chemicals**”  
(Registration, Evaluation, Authorisation and Restriction of Chemicals - **REACH**)

The REACH regulation requires that all chemical substances produced in quantities of more than one tonne per year are pre-registered or registered before they can be approved for distribution in the European Union.

**RK Rose+Krieger GmbH does not produce any substances affected by this regulation.**

We only sell products which are defined in a chemical-legal sense as “article” and not “substances” or “mixtures”, in accordance with TITLE I, CHAPTER 2, Article 3 “Definitions”.  
According to the requirements of the REACH regulation, **RK Rose+Krieger GmbH** is a downstream user and not subject to REACH registration requirements.

Furthermore, we can also confirm that we have no knowledge about products produced by **RK Rose+Krieger GmbH** containing substances in concentrations that exceed the permitted limit values laid down by “**ECHA**” (**European Chemicals Agency**) in its so-called “Candidate list” of “Substances of Very High Concern” (**SVHC**).

Nevertheless, in the interests of both ourselves and our customers, **RK Rose+Krieger GmbH** keeps a register of hazardous substances, in which the annual quantities of chemicals used are recorded and continuously updated.

Please do not hesitate to contact us should you have any further queries.
